Letter re: USEPA review of draft Quality Assurance Project Plan, dated Aug 28, 1997

Dear Mr. Messier;

The Illinois Environmental Protection Agency (the Agency) is in receipt of the above letter which provides responses to comments generated by the USEPA during its review of the QAPP for the Fire Fighting Training Unit. The Agency has reviewed those responses and discussed them with you and your contracted consultant to clarify various minor issues. At this time the Agency is satisfied that these responses address all concerns raised in the initial review comments and the Agency accepts them.

Please contact me at (217) 524-5953 if I can provide any additional information in this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Donald W. Harrison".
